## City Futures Research Centre

**City Futures Research Centre spans the interrelated areas of urban planning, housing, health and well-being, urban development and urban policy. All are underpinned by high-level GIS-enabled urban big-data analytics and modelling.**

### Competitive advantage

- Australia's leading urban and housing research capability
- Assessed by the Australian Research Council in 2018 as "well above world standard" for urban planning and related research

### Impact

- Seeking to increase public, government and industry awareness and provide high level strategic advice on the intended and unintended outcomes of city policy, programs and development.

### Successful applications

- Internationally recognised research on housing, land-use planning and urban equity issues
- A world-class urban big-data analytics, visualisation and modelling capacity
- A track record of research on policy barriers to energy use in the residential sector and energy efficiency for lower income households

### Capabilities and facilities

- High-level policy review and analysis
- Qualitative evidence on impacts of energy poverty on disadvantaged households
- Analysis of energy consumption in the residential sector
- A world class City Analytics Lab and expertise in GIS-enabled urban analytics, modelling and visualisation

### Our partners

Established research partnerships with:

- CRC for Low Carbon Living
- National Climate Change Adaptation Research Facility
- NSW Office of Environment and Heritage
- Australian Urban Research Infrastructure Network
