

City Futures Research Centre spans the interrelated areas of urban planning, housing, health and well-being, urban development and urban policy. All are underpinned by high-level GIS-enabled urban big-data analytics and modelling.

Competitive advantage

- Australia's leading urban and housing research capability
- Assessed by the Australian Research Council in 2018 as "well above world standard" for urban planning and related research

Impact

 Seeking to increase public, government and industry awareness and provide high level strategic advice on the intended and unintended outcomes of city policy, programs and development.

Successful applications

- Internationally recognised research on housing, land-use planning and urban equity issues
- A world-class urban big-data analytics, visualisation and modelling capacity
- A track record of research on policy barriers to energy use in the residential sector and energy efficiency for lower income households

Capabilities and facilities

- High-level policy review and analysis
- Qualitative evidence on impacts of energy poverty on disadvantaged households
- Analysis of energy consumption in the residential sector
- A world class City Analytics Lab and expertise in GIS-enabled urban analytics, modelling and visualisation

Our partners

Established research partnerships with:

- CRC for Low Carbon Living
- National Climate Change Adaptation Research Facility
- NSW Office of Environment and Heritage
- Australian Urban Research Infrastructure Network
